Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant requested interview to bring the NPL document identified supra to the Examiner's attention as support for applicant's argument that a material's impermeability to water vapor does not guarantee an impermeability to ethylene oxide, contrary to the Office's position on claim 58. The document includes evidence of certain polymers which are water vapor impermeable, but are permeable to gaseous ethylene oxide. Dischler merely teaches a polymeric layer and thus the publication shows the unexpected result of a polymer that is water vapor impermeable but is permeable to gaseous ethylene oxide. Examiner agrees that this document is sufficient evidence to overcome the rejection and advised applicant to either submit an amendment after final including a Rule 132 affidavit that includes this document as an exhibit, or file a request for continued examination (RCE). Applicant also requested the interview to request consideration of information disclosure statements (IDSs) filed 5/23/07 and 7/9/07. Examiner advised that the IDS submitted 5/23/07 will be considered in the response to the after final amendment, but that the 7/9/07 and 8/8/07 IDS are non-compliant because they cite two non-patent documents without providing a copy in accordance with 37 C.F.R. 1.98 (a)(2)(ii) and thus will not be considered at this time. Applicant indicated that the option of an RCE may be pursued.
